

A DA IN THE SHU

I awake this morning to my pitiful predicament. The instant my eyes popped open I shuddered from the reality of harsh ~~environment~~. <sup>suddenly</sup> I stood and moved ~~to~~ <sup>to</sup> the center of the cell to perform a simple test. sure enough <sup>standing</sup> in the middle I was able to touch ~~opposite walls~~ <sup>opposite walls</sup> with outstretched arms. the cell was about eight by five. five feet wide and eight feet long. A cement box smaller than the size of a home bath room.

the cement walls, floors, and ceiling remain cold as ice, as does the steel bars and steel mesh that front the chamber. Imagine that your home bath tub is a bed. what you might visualize us living in a bath room except the tub is a bed.

My meals are delivered cold, and I eat one foot from where I defecate. to save money ~~that~~ <sup>solit flushes</sup> flushing is computer controlled and limited to two flushes every hour. any timing miscalculations may result in raw sewage floating beside you while you eat.

The prisoner next to me is dynamic! He sings, he crys, he prays, and shouts at volume ten day and night. It seems murders are the most "religious," prisoners. Is his outcry a quest for salvation or a demonstration of his psychosis? Only God, can judge that. In the cell on the opposite side with me in the middle, a ~~seventy~~ <sup>seventy</sup> year old prisoner languishes strapped with a sentence of 25 years to life for driving a car under the influence ~~while under the influence~~ of alcohol. He's a California three Strikes victim of the state's draconian sentencing policy He's eligible for parole after service of the minimum 25 years when he'll be 95 years old.

Down the tear a prisoner wails, "the dentist stole my teeth!" another ~~prisoner~~ <sup>whose</sup> had all of his teeth extracted because ~~SDCR~~ dentist extract teeth rather than fill cavities. No root canals are performed! an extracted tooth never requires future repair. Fiscal concerns trump dental care.

Treating prisoner inhumanely, stigmatizing them as social leapers, terrorist gang member or associates, aggritating society like spectacle in the Roman Colosseum clammering for blood..thumbs down no reprieve for the disenfranchised, non-wealthy marginalized=everyday people.

Its strange how american socirty communicates its acrimony for the powerless. Scores of poor people, prison class class, are murdered everyday in A America. Yet, look at 48 hours evey saturday night and the television show sppaks to justice issues for the rich privadged, business, and University classes. Likewise its always the poor who are sentenced to death.

Answer this questionabe sham; How many times, if ever, have you saw a news story of a group of african american Police Officers gunning down and killing an unarmed 14 year old carcasian youth? whow! In my 65 years I've never heard of that. cops who kill unarmed citizens seem to always have the same explanation. I feared for my safety they say.

A craven coward is always fearful, eben when its abnormal to fear. armed to the teeth, protected with body armor, trained to shooting excellence or proficiancy, shotgun, rapid fire pistol, chemical weapons, night stick, untol milataty back up. Helecopters, and cops fear unarmed youth or people of darker complexion. New York City official Policy of racial Profiling is an example of criminalizing skin color.

American Exceptionalism is a code phrase for superority. I'm better than you it says. Truth be known, Countrys like Denmark, Norway, Sweden, swissweland, live in highly social advanced political invironment far superior to supremist United States.

This dicrocian government, records all communication, political, personal it don't matter. The information is stored in coils like a spring waiting for the oppertunity to spring forth and expe||ee all our most private affairs. J. Edgar Hoover, had files on the powerful. The New World Order has files on every. remember the movie Escape From New York? well the premiss is the same, but the reality is america, the United States Of America as a Nation is a prison. Multiple layers of "prison guards," keep the "prisoners," in check drones already fly above our cities. Soon drones will rain live fire on inner ciyt and rurual communities, and "callateral deaths,|| will be explained away as the new normal,

Trippin' with my own thoughts,

AKA BOMANI
