Short essay on hope,

## LET'S THINK ABOUT IT

We are destroying ourselves  
In more than One Thousand ways  
And you can't say I didn't know it  
For they are in front of our face.  
We have the problem with AIDS  
Spreading all over the earth  
And we have to live everyday  
With fear and always alert.  
Then there's the problem with drugs,  
Making this world just worse  
By bringing violence and crime  
And sometimes even divorce.  
These are but just a few problems  
That we are facing my friend  
The list could go on and on  
And surely would never end.  
You take your time to find out  
And think about what I say  
Is it not true that this world  
Is just worse day after day?  
But you and I can do something  
About these problems, today,  
If we just put more attention  
To those who cry everyday!!
