① My name is Willie Clemons I'm A juvenile lifer
in Michigan Department of Correction First of all I must tell the
World Prisons are not the place for any human being.
Staff are not train nor tryen to rehabilitate prisoners in any
Shape form or fashion I have come to understand in the
department of corruption The only one CAN chang, Rehabilitate
Is the prisoner I made that choise to better my self and
Study my self I use to Stress a lot to I learn not
to stress about things I have No control over I have
lost my sister to Cancer at the age 34 and yes it hurts
at times I wanted to take my anger out with violence
but I have learn violence is not the key to solven
problems from lost love ones, I focus on doing everything
in my power to get out of prison so I can spend
precious time with family and show them with action
my love is unconditional, I want to help change the
youth by being A rolemodel. I have wrote to places
were youth are locked up and played A positive
role that help them make A change for the best,
Healt is very important and I can honestly say we
get the worse treatment, I have seen the most
Corrupt DR. nurses on the planet I once over dose d
off medication told nurses and DR. and they
told me to write A kite they didn't have time walked
away laug en With Staff I almost lost my life.
And mental health is A joke I have A serious mental
health and been on meds for years for it but
instead of these people senden me to A program
they put me in Segergation for over A year to punish
me starve me refuse to feed me I went from
160 ponds to 112 pounds I have been chained
up for 2 weeks like A slave to this day I still
have marks from how tight the chains were on
me so tight I was bleeden.

②

But I must say it's more mental and family support means a lot. I'm blessed to have strong family support. Education is the key to success. I have learned that over the years and reading books going beyond my comfort zone has helped make me a better person. Most of the prison population is lost mentally. Don't even use their time wisely and it's a shame. A lot of prisoners use their time doing nothing. Wishful thinking. Hoping a blessing falls out of the sky. Not making their dream manifest into reality. Me being a political prisoner. I have a different frame of mind. However, I do break the ~~z~~ psychologically chains of slavery and most of all, I know only the strong survive.
