

Dear Reader,

Jan. 30, 2018

When I sit back and ponder on the everyday events that, the Private Facilities keep out of the naked eye's view. It brings so much Frustration and Pain to me knowing that they are allowed to continue, to let it happen. Simply because they paint this beautiful picture of Rehabilitation over the news channels and news papers, An in fact leave out the Raw Reality Behind closed doors. With a system that covers all these faults and leaves only us to Blame, where the fortunate, are the only ones left to Prevail and the less fortunate to endure.

In a situation of such severity as Incarceration, where Authority figures have the upper hand on the "small guys", which is us. Knowing that the majority of the Residents housed By them are 85% Time servers, An have to Recieve two-years of Clear Conduct to Even think about Clemency / Post-conviction Relief or Parole or simply having a case looked upon with conviction. This causes a Domino Effect of threatening Misconducts Reports for anything Imaginable it seems. Rather it be expressing freedom of speech, Hanging cloths to dry in your cell, or something as simple as forgetting, to Tuck your shirt Before leaving your living area. Cases where Employee's Intentionally Begin to Provoke Residents into going into Defense mode as any natural human Being would, then Blame the Results of the actions on the latter. Simply to Invoke

Suffering on the Resident and get some type of sick satisfaction of Power and Control on there own Behalf.

A Couple of Similitudes of minor incidents that caused Big issues without statement of names for my safety. During a morning of Being housed in segregation unit, I awoke to a Bunch of obscenities Being yelled and Door Kicking By another Peer. He was in Rage after Being Deprived of a Shower and hour of Recreation Because he had a Towel hanging up in his cell to Dry after laundry Returned it moist. The officer Simply passed his cell without inquiring him about Showers and Rec. This after asking everyone else. My Peer Begin to Complain and after hearing the officers excuse, He explain the situation of laundry. Still the officer Refused him of his Rights of a Shower and Rec. The Resident screamed and Kicked for help from a higher Ranking officer and about his civil Rights Being violated. The officer Threaten him with using Pepper Spray if he Didn't "Shut up" and Refused to call his superior. After several hours a superior came on the unit and the Resident talked to him. The officer was told to give him a Shower, when he finally did he grudgingly applied the hand Cuff's and escorted, the Resident to the Shower explaining to my Peer that he would Be Receiving a misconduct for Disrespecting Staff and Attempted Distruction of State property. Another Similitude is that of a incident, where one morning I awoke to

the screaming and kicking of another Resident During Breakfast feeding. A cell housing two Peers were neglected of Being served food. The officer simply Passed the cell Because there light was not working Properly. This Caused the Result of more kicking and screaming for help from higher Ranking Authority or anyone else that would help them period. To there Relief a sergent officer Just so happen to be Doing security check a few hours later. Once the Resident informed the sergent about the officer Refusing to feed them for the light not working Properly and threatening them with misconducts for kicking on the door and screaming obscenities at them for there neglect of following Protocol, The sergent made the officer feed them. They still Received misconducts for Disrespecting staff and Attempted Destruction of state property, An for a good cause if you ask me simply to get feed. It all Just puts you in the sense of the old saying, "Being kicked why your down."

Guilty and never Innocent, thats Always the motto in the Private and D.O.C facilities. Simply Because we are already incarcerated and criminal statistic's. It seems that no matter the case we are always wrong and the system never anything, But Right. In times when a defendent is found guilty for any misconduct written on them solely Because a officer wrote the Report. An the catch 22 is in order for a person to ask for help from higher authority we are charged a fee Just to send paper.

work out, Rather it Be two-dollars for D.O.C Administration for Appeals or four-hundred dollars for a civil Rights lawsuit. It all goes Back to the point that only the fortunate are left to Prevail and the less fortunate to endure Duress.

Only if the naked eye could truly see, the Real issues Behind closed doors. The stuff that Doesn't go into the news papers and on the T.V. I am a living witness to the words that a Camera can't Pick up and the extra few minutes that it takes for a first Responder to Arrive on the scene. The Private and D.O.C facilities are no more than a gang itself in a sense, at least that's what it seems after witnessing the truth of how facilities are Ran Behind the scene. These are only the tails of a few similitudes, minor incidents. To the Compassionate and understanding Readers this is only the Beginning of my Eye opening Revelments, so Stay tuned.....
