Prison Creates a disdain of Aptitude in terms of Adapting - A crucial aspect in regards to creating that balance^{to} exist in an abnormal environment of controlled chaos. The up hill battle in efforts to sustain the conducive elements in Rehabilitation is not a high disadvantage, because there's no pattern of reward for the individual subjected to the criminal state of mind since the Adolescence of years that shaped his or her mind as a child. If you give someone something to earn, it creates a new pattern of learned behavior that has the potential to Redirect the stemmed acts manifested from the cultural teaching of the streets. This isn't only vital in the Journal of Rehabilitation, but it's essential in terms of curbing Recidivism and aiding ones in the ability to think, develop and forged the will to succeed and properly handle enduring circumstances of unfortunate depths. The Truth-in-Sentencing law requires the individual to serve 85% of their time, and leaves no room for earned good time credit. I'm 29 years of age and I've been isolated from society for nearly 11 years. I was convicted of

Two Counts of Aggravated battery with a Fire Arm
And sentenced to 30 years of imprisonment,
with no background. yet, I was sentence with
the disregard of Rehabilitation. I WAS 18
years old when I was arrested - meaning if
time runs its course as projected, I would
be 44 years of age upon release. If prison
offers no kind of help for violent offenders
no aid in efforts of Rehabilitation. Throwing us
back into the throes of society is a failure
to not just society, but to the individual
within it's self. Who are willing to hire a middle
aged man fresh out of prison? would you?
So, the prosperity of an ex-convicted felon
are slim next to none - but not impossible.
The politics that has the stronghold on the penal
institutions are idled and geared towards
a financial blueprint of Capital Gain - at least
that was the agenda. Illinois leads nearly all
States in over turned conviction in the entire
country. It has ~~been~~ been stated that, the
State of Illinois would rather allow a
plea of Guilty men to go free, than
to rather admit an ~~admission~~ admission
of their own fault or ~~incompetence~~ incompetence
and/or corruption.
