

Blowback

Shortly after my first submission to Hamilton college regarding my experiences with T.D.C.S. and its example of the status-quo of -itself as an institution, the M. W. Free-Stiles unit in Beaumont, TX, I was roused out of my sleep in the late-hour, and shipped from the unit. It mattered not, the Hazelwood benefits utilized from my U.S.M.C. service, nor the FASFA Federal Pell-Grant I was currently using for this summer's semester, gone, along with the possibility of completing my Liberal-arts degree, Coincidence? Likely a fine example of the dangers, and confusions of moral-relativism. The inescapable universal-truth remains - it did happen! Here I sit over one-month later within the confines of a dilapidated prison cell, without even as much as a light bulb, yet full of roaches, and ants, as well a feces in a clogged toilet that refuses to flush! ... no matter the extent of exerted effort,

upon being removed from the stiles unit, I was amerced to the segovia unit; and conveniently for "them", I was assaulted in transit. Instead of following through with policy, and procedure - corrective action, I was written several disciplinary cases, minimizing their wrong doings + stealing well deserved, + hard-earned privileges like attending college - retaliation... over, and over again. Knowing that the prison population has been forever divided into diverse groups of feeding

hispanics, but to see that 99% of the representation - of the policy-making system was also hispanic was ... eye opening, devile, and Conquer at its - finest! If the government, comprised of mostly Fair-haired persons, colored eyes, and lightly shaded locks, truly cared - where were they, to you know, Supervise the policing of the madness? I bet that they are present when it comes to carving up the budget for these failing "concrete-cvens," near the mexican-border, and anywhere there is a profit to be made from the Labors of ... You, THE TAX-PAYER!

As a republic, the officials that you-all elect should be representing your best interests, and as the back-bone of the United-states, you should accept nothing-less!

If the governing body were to truly-see what takes place inside these concrete cest-pools, then they'd have no choice, but to acknowledge the problems, then the acknowledgement becomes a problem for them, their associates, and of-course their pockets!

There is a ginormous difference in simply believing something to be true, and knowing-it-is-true - a FACT! ... but, someone would have to care enough to investigate.

Truly
 Brian C.
