# Education is our most vital MEANS of Survival For our Youth! by: Franklin J. J. J.

To BE AWARE is to BE ALIVE! A simple phrase, yet an dynamic  
Clause that make or break your life. Without seeking knowledge of your life,  
Others life, your surroundings and all existence period you will fail. Education  
is the only ANSWER to Failure. It turns Failure into only a mistake.  
You are mistaken if you think you cannot make mistakes in life. No matter  
how Educated you are...

I write this in hope to reach someone heart, because this comes  
from my heart to your heart. Make no mistake about it this something  
is not for the faint hearted. This is handcraft for the youth seekers and  
positive different makers. I express the love I feel, the pain I feel, the  
Annoyances I see and face everyday. The struggles of my comrades and  
those who feel I'm not for them. I do this for them also.

The President of the United States makes a STATE of the Union  
address. So I ask what about the state of the people? Those who are  
ignored of the systemic challenges of Equal Education and Employment and  
to become an Employee. Those treated like cattle or counted many  
times a day in prison like property not humans! The state of the  
homeless, why so many homeless, unemployed, those that receive governmental  
assistance. Why, do those in this position in life has to be known as  
a number or statistic. What only for political reasons. Same, sure not  
for social justice to correct this. Hands that are void of action will not  
work. We will and must act. Resist to lay down and accept what we see  
and face with an antagonistic bases.

We are dying off because of Pure-Ignorance. We are failing to  
unity and teach each other the ways of resistance. To know when we  
are being decided used as puppets, human chess pieces. It's sad to say  
here in the ABC the camaraderie amongst the inmates is thin. To here  
you would expect us to unite. Only 10 out of 100 will stand together for

②

RIGHTeous CAUSE of just being treated like humans instead of CATTLE. Out of the 10, 5 will be willing to make the all the way needs and sacrifices for change. THESE ARE FACTS I HAVE BEEN AWARE of or feel myself or witness first hand.

My blood I HAVE shed just to get CLEAR WATER to drink of SUSTAIN life. So I feel everyone of think, think, then think some more before you think of make ANY decision that could lead to these concentration camps they call prisons. It's sad to say you HAVE some people who say been there done that coming back out of prison is nothing. Yeah, until you come here with needs in your corner of support you, of care for you. Keep your mind active in society. Even if you have all this you can still lose your life any moment. NO ONE is ABOVE it. I know first hand. Why? Because I would physically be preparing myself for my return to the so-called-free society soon but I feel the life of another inmate. Who was close to going home himself when this happens. See dude, ego, trying to be down. All joined with gangs, groups, families, etc. If it doesn't make you a better father, son, professor, preacher, teacher, has blood friend, master then you need to get back before you become collateral damage. The only real people that's going to miss you more than a word is your family and the righteous individuals. Those who going to be here for me after all this is my family. My so-called heroes no whole to be found. I HAVE A FEW. That's very rare, but those dudes ARE positive difference makers. Be careful of the life you choose, the friends you choose or you go be another story for the evening NEWS!

THESE the things we HAVE to get rid of. That sick thinking. But it's a cure. It's called a "decision". Yeah, I made a decision to no longer be the prison. Why would I reward sick killing myself slowly and interesting

(3)

offer people jobs. When something happens to them I may have a cell done it myself but I exposed them to the sickness called "Self-Destruction".  
Confusing my family. I say I love my kids, yet, I was the greatest loyal to them. I say being a dead beat daddy is my greatest fear yet here I sit in a cell in a Maximum Security Prison because they so-called free I bring or lack of Authority. I have Self-Authority and Self-Respect. Since I can't be there for my own kids. I instruct the officers to take heed to my life and points to avoid my same mistakes.

It was written in the Arkansas Gazette, out of 1500 students that are being affected by the closing of schools in their state due to budget cuts, 97% of these students are black, Latino or New-White. This is almost 80% of the students. These are the laws applied during the Jim Crow laws in the 60's in the South. The Case of Equality is being preached by the same people who passed these laws. This is an injustice no doubt. A real sobering moment for me. All the things I've done in my life that was stupid and wrong, not taking advantage of the opportunities I've had in life, this is making me bend my neck in submission to become a calling greater than myself or any one individual. I will do what I can to contribute large or small to this systemic hurdle even if the majority of the world understand or want to accept this. This is my duty as a human being. This is an act against humanity not just those students and their families.

I've been given many names (aliases) "Murdah", Mark <sup>and</sup> Mark, just to name a few in the phase of my life when it reflected the essence of what my family taught me growing up and as an young adult.

I wasn't a product of my environment, my environment was a product of me. Now I scream at the feet of my lungs. "You pay executives, politicians, millions of dollars; yet, you tell me you don't have enough

(1)

money on budget to keep school doors open. But you can pay them millions and have prison yards open!!! Who you think go occupy these prisons? The same students force to leave when you close down their school. This is a cold-hearted game a systematic warfare move against the un-educated and less fortunate. I refuse to lose. Definitely will not let our youth lose to this plot! I will SCREAM until my voice leave. I will spill it out with my blood if need be! Justice will be establish on earth. We are at war with the future of our youth. The first blood which is the most vital is against Educating the bugs. What's next are kill each other daily because we don't understand we killing the person who could ~~save~~ save at least our children on the world for good matter. We mad at each because I give in this hard on projects when we are being shot down daily used to human chess for everyone's agenda put our own. What senses that make. We say we gangster, killers, Punk etc's pushers. Yet we get treated like we not. We being killed, Punks and tashed around and do nothing but help kill each other hold each other back.

It won't be no next if we don't wise up open our eyes stop being selfish and pave the way for your future family your neighbors and all humanity future for this I do it sacrifice my life!!!

So I ask who smarter: He who puts kids in classrooms or in cages!!!
