Through this letter in the conditions that I live, the space is very small there is three beds in a space of 8 square feet. The doctor, when someone has a health problem they go to see the doctor and they only give him some pills for the pain and the truth is that they ignore us, unless they see that you are dying. The food is really bad, very small portions. We got lunch taken away, and replaced with a paper bag that truly has almost nothing in it. If you could only come in, and see the reality in here. The commissary here sells everything very expensive and there are very little options, they barely have anything good. For example a jar of Folgers coffee is 12 dollars. The sentencing, we get here and do our regular time, we go to parole, and they might say do a couple of years, or they could also say to full sentence. I ask them to please get into this matter more thoroughly. For example, in my case my sentence was one year, I completed it, and they gave me two more. I don't have an open date, and I don't have any infractions, I'm cooperating with everything they have asked, and I don't know what is going on with my case. Thanks, I hope that they do something about this; in the end we are humans as well.
