Because The prison industry is all that matters when society does not need to prove anything and the only appeal provided is inherently ineffective Due to the fact there is NO checks and Balances where in The Court or State's Attorney or even the State provided Appellate attorney is bound by law to make certin all records of Court proceedings and or investigate wheather or not The evidence produced at trial was legally obtained or presented or even if any evidence exist at All TO Support a Guilty Verdict - This will always result in mass incarceration's Gross Disenfranchisement of minorities & or majority of Devalued human's to be victimized and Used to extort The taxpaying population in Order for There Community of prison Guards Wardens and Other special interest Groups to become enriched while pushing the undesirable element such as my self to only have Value so long as I we can and will continue to be a exploitable ~~resource~~ resource an excuse to channel taxpayer money's into there UNION that is the most if not second most powerfull UNION in the Union of United States The California Department of Correction's and Rehabilitation is 20 Billion Dollars ~~Strong~~ Strong if it where possible to eliminate 3 strikes and Effectuate The courts only allowed One enhancement I am Quite certen CDCR would find a way to violate 80% of All parole's and requier them to return to prison Custody so The money would Keep Pouring in and if the money Dried up as in a Depression The prison's would be emptyed OUT over Night. Please lets Get real - Even if say when I am 67 and I have 25 years in Prison - The only reason I would Be paroled is Due to the fact that people over 60 make money only for medical Community NOT CDCR! and such release would only facilitate me be an old man in the gutter Homeless with NO family friends ect - IF I could Get out while I Now have real chance to make a life where I have a wife and or pice of property That I can be Self Supporting and less reliant on Welfare disability Check I would have Good reason TO Get out and stay OUT if NOT - Then I will be institutionalized Completly. As of now There's Some hope of Justice I have sent copies of my Court reporter Transcript of the proceedings of trial that ended in my conviction to be analyzed and acted on by a local Attorney [redacted] of [redacted] and several so called innocent Projects so mabe some one who really believes in equal Rights and Justice NOT JUST US will Fight for me and all who sercome to similar Circumstance. IF NOT SO Then at that point where I myself becom aware that I have reached a impass - were there is NO hope for Justice and or That Justice is far to late I must really Look hard at my Self - See page 4 Over

and my situation and ask myself ① what do I want out of this prison life & ② seriously Answer Number one and stick to it even if it may bring about my own Death or become a real murder'r to get the punishment weather that means being the active perpetrator of my own Death or facilitate the Death of others to obtain what ever ammount of relief to obtain an achievable Goal. One thing for me would be certin if I had my own Television as a very emanice distract.ion from my predicament - The reaching or final awareness that such empagg has been met or even acceded would be less likely to occur or acted on. - AS Ways of Coping I have found Art especially Origami very effective an affective coping mechanism. The Number One causes of Violence is the guards as custody will not allow hungry men to eat enough to get full and any expreienced intelligent Woman will tell you a hungry man is an angry man and when ever you put 100's of angry hungry men together Violence will happen as surely as tossing lit cigeretts out a car window in the forest on a hot day will cause a forest fire. Even if the kitchen were to serve us a fourcourse meal custody wont give us time to eat it and if we try to take it back to our cell they search us take it and possibly get a 115 write up that will add time or take what little privileges we have left. This also adds fire to heat up anger already present. The health care - what health car? When I was knocked down and my leg was stomped on and Broke Bone stuck out I was kept at GFC 17 days then taken to Hospital - merically it did not kill me

and or gangreen set in and the Surgery saved my Foot and rest of my leg but I have ongoing Nerve pain and my opiod medication that actually worked has been taken away and All the Healthcare people will Give me is capsaicin Cream - like rub Super hot Chille peper on it and an anti-inflammatory med Actoniphen - Tylenol when I have Deep in the bone Nerve pain Not sore muscle's or arthridic Joints I have complained and 602 over and over to No Avail - NO Body Cares when more expensive NONE Opiod's exist that can be prescribed BUT They wont when it cost them money. No back on top of all this the people like myself that have nothing and cant get anything even if we were Given a Job 8¢ per hour = 0 when you have 10,000 plusse restitution and PLRA minusing our accounts Equates to a lack of Material is an Conditions of extrem and unusalle circumstance to excessive punishment. The education is Good if you can get into vep other wise you get assigned to ABE III Ged and you may never be allowed and Given GED test because if you pass they cant keep you in there Class room Just fix the blotel expenditure in education Dept

As for employment conditions ~~there~~ There largely NONexistent and or NONE pay you a ~~the~~ living wage while inside the wall. The environment for Volunteers is very much by custody is made hard for them as it is no great wonder why the apparent void of volunteers accepted or allowed to interact with prison population every year I have been eager to participate in Victim Awareness week in April But this year Nothing. As for the aging Prison Population I am becoming a part of we are left to die or when the medical finds out we need long expensive care facility we are denied or we are suddenly come up with a reason to kick you out of the prison system so they can't be held responsible for you die before parole date.

As for a vision or version of a better way to operate Politically institutionally ect regarding the present prison system is to seriously be more responsible - to become more active in looking at an inmate and Question whether or not the court system May have not considered the totality of and by which Jury reached a Vote of Guilty and be more open to consider such conviction and sentence sending them a person to be an inmate of these facility may be improper when the only records sent by court does not containe the actual recorded actions in trial resulting in his being found Guilty for said crimes as was and still lacking from my C File. As in prison there exist in title 5 operations and Policy a recall of commitment not only for the dying person but when circumstance's are found that it would no longer serve Justice to continue incarceration a Representative Parole Consider may refer to sentencing Court a recall of the commitment and have inmate released. I showed how where and why my continued incarceration no longer serves Justice by the court reporter transcripts - They claim since they are not in my file there is nothing shows my continued incarceration would not serve Justice or no longer necessary Denied Such practice is creating a Bureaucratic cop out and not acting responsible yet we are and they are not be held responsible is wrong and will only increase Torment see page 6 — over →

Continued essay ~~from~~ Page 6

Since 2010 I have been transferred from my original reception DUI while on Hot meds - mental Health drugs that require I stay out of the heat) to Iron Wood the southern east part of California and quite possibly the highest temperature prison in California or is it actually Arizona? Because I was medically restricted I was then transferred to Chino reception where all my personal property was taken or lost - Then I ended up at Pleasant Valley State prison in 2011 where I received my TV - after I was victimized leg broken my point level of custody went up and was sent to High Desert Prison Susanville California the North West east most part of California while it is quite cold that's little trifle inconvenience as it is and will all ways be where CDC puts its most unrehabilitatable violent scum - I did not belong as I was a victim SUEING CDCR and its officers. The transfer was obviously done to facilitate my death sat went suicide over and over until I was deemed EOP and since there is NO EOP facility at that prison I was sent to Mule Creek State prison. So you see I have been from CDCR's Northern most and Southern most prison east west and in between. What I'm writing about is what is in existence at every prison I've been in with few exceptions sat F Corcoran after almost 5 years requesting I finally got orthopedic shoes that greatly increase my ability to walk around in less pain. At one point I agreed to try a medication for mental illness so I claimed to also treat my back issue but as of yet from March [redacted] to April [redacted] I have not received any treatment except for the topical hot pepper cream and anti-inflammatory drugs NO drugs for nerve pain. I am Health care 602 again filed against the prison Health care system yet very doubtful any relief can or will be obtained. It is my experience as of 2018-2019 the money has ran out for Enhanced Outpatient Program - E.O.P. As I have experienced being discontinued from program participation regardless of achieving any of my goals for being placed in the program in first place has put a severe strain on my psychological survival due to the fact that the disconnection of the Art class along with the warden's of most prisons have stopped all hobby craft program regardless of the fact such program is self sufficient when projects were sold and money obtained went back into the program and provided financial support for the gifted and/or multi-talented inmate's I suspect the latter was actual reason for prohibition of program so as to keep stress high and thereby manipulation of the mass's so incarcerated into committing violent acts to justify CDCR prison industry from ever letting its incarcerated to be rightfully considered rehabilitated and set free. Case in point the first profound step any successful tyrant must eliminate its "artistically endowed Free thinkers" in order to maintain control over general populace and consistently apply pressure and provide an environment of fear from which the mass's are easy to manipulate.

See page 7

Continued essay Page 7

- Case in point when the Sencative Needs yard where created it provided a safe environment for those who's crimes would have required the status quo or person's without crimes of a disgusting sexual nature or those known to speak to police about the guiltiness of others.
- had and are still expected to render punishment of death.
- That type of incarcerated were kept apart & free from gang members that must carry out death sentence on those convicted of such crimes or be killed them self. The SNY prison's were virtually free from institutional murder and much lower rape and many of the races lived together in harmony - this was a threat to the way CDCR operated and still operates so custody started to allow active gang members to quit there gang in general population and program SNY were fore in/under GP they who could never become shot caller or boss now were enabled to become the head of there restructured gang & gang's Dropout like north annyos who quit became northern Ryders who split into two sub groups of Iron independent ryder and three flower's. The southern gang's Mexican mafia split into emma and la family and so many other divisions its so confusing even the one's who started the hole mess have little or no real control anymore as there focus is to raise and maintain chaos where all drama is generated to keep US from joining against the system to raise awareness of it and so by break free from the system replace the system with true self government of the people by the people for the betterment of all its people regardless of established name or class.
- This can only work for a fixed amount of time cause the Antisocial Free thinkers are required in fragile part of innovation & adaptation necessary for survival of a society especially when uncontrollable changes occur by nature or outside force's activate change in hope of benefiting themselves having disregard for anything but them self or there political group be it republican, Northern Ryder - Democrat - Crip - Blood or communist Socialism & skin heads. The economics of mass incarceration is the same for the mass manipulation Both are the same in principle.
- Both are and will be destructive to the eco system and effectuate the destruction of this world and just as wave capacitance exist in electronic science you may see the big picture were such practice's must eventually bring about if not the end of humanity.
- to understand wave capacitance one only need fill a tub with water and move your hand through the water until a wave is created traveling from one end to the other back and forth

See page 8 over →

At the Apex - when the wave bounces off one end and starts its journey back to the other side add 1098 more force as you do so you will see the wave encrees in size and momentum will soon cause most of the water to splash over with increasing verasity with little effort this is the effect of waive capacitance or Plariflaregation when its applied to a nation or state is like the tub in the disclosed experiment mass of people as the (water) pressure being economic Political and or geographically designated by resource and ratio of ethnic ~~as~~ as to just what kind and amount of stress will be applied to create and move the wave of fear or race hostility along with resource's or lack of is what equates the amount of stress just as you know when to add the 1098 force media and feed back there from gives the timing & Direction of force to keep the mass population ~~ben~~ free or incarcerated - capable of manipulation & controll.

On my Practical

Views on Reform I must say this "Hay Stupid" Before you can reform some one you got to know if there actually innocent second you have to have common sence to under stand legally innocent is actually innocent and actually innocent dont need reform or Rehabilitation they must have restoration in all aspects including all rights and or privileges such as the right to leave this controy for another with finaceual compensation Case in Point Kamala Harris before become senator admitted and was Quoted in San Quentin News when she was Attorney General she knew 4000 inmates from 2010 - 2015 are Wrongfully convicted and only 600 of those case were over turned - sence most of those case's are murder or violent she as the opposi~~tion~~ had the power and ethreal right to dismiss those cases being 4000 yet zealously denied or affirmed Prosecuted there conviction's on appeal she knows are wrong and should be dismissed shoves she is not concerned with doing whats right But only acted in behalf of the special interast Group that is the prison industry complex and Fuck you if youre poor so as to be found Guilty you will Be Grease for Ther money mechiene in closing see page 9

IN CLOSING TO ESSAY PAGE 9

Just as it is my firm belief that around 34 AD some one like myself in circumstance of being brought to Debter's prison upon the wime of Ceger or a Judge with the mind that at least myself he will be Given good food provided exceleant excersise and finest Health care The collesseume will provide training and advancement if he -myself- survives a few lion's and with any luck dispatch a Gladxator Why all he -myself- would have to do is overcome aversion To Slautering a dozen or so Christians To appeez The mass populas distracting them from The Deplorable actions of senet and ceser - he myself may become Citizen once more in The empire that will last a thousand years. — I have no Doubt someone said That back then yet rome fell & Hitler mentined Thesane about his third rock - the only reason USA has lasted sofare is that God has blesed it with The riches of The Native american and Just as The native american is almost none existant devo to being Starved To death as 300 men women children of Gost ridge Dakota The ones who have survived only 10% speek there ~~own~~ own laguage. This Just shows that ~~the~~ The same mind set to re enterduce wolf into Federal researve land To put balance back into The Natured environment may work yet is Valueing wolves more than The "people" that maintained balance long before The evil white man! This is the same discusting kind of practice I hope and pray will bring USA into NONE exsistance Very soon!

I am a firm believer in The fraze america Love it or leave it well I No longer Love it and senserly Diesiere To leave it For Neatherland - der Duchland der Fatherland is Freedon land Far from The Prison industry complex USA. Kenneth [REDACTED] April 10 2018
