

# WAR READY

"The Purpose of terrorism is to terrorize, and that Sympathy in a Revolutionary is as reprehensible as Cowardice on the Field of battle..." - V.I. Lenin

When we speak of war we are speaking of the war of OPPRESSED versus OPPRESSOR. Comrades we are at war with the Capitalist-Imperialist on top of the war within ourselves. We must bring the beast down to its knees, and by doing this we must create revolution. The revolution is about change we need to change our mindsets first and broaden our minds to revolutionary consciousness.

We see what's becoming of the world but yet, as a whole we're allowing the world to decay from the exploitation of Imperialism. We as New Africans, old Africans and all oppressed people and nations are under attack. We are under attack through population control, ethnics, environmental, poverty, education, health, family, economics, judicial etc. The only way to win this war for future generations is by overthrowing Imperialism. We do this by "Unity", by organizing the people and giving our lives to the revolution.

FEAR is the disease that's infecting our movement. Fear is hindering us from waging war and these pigs know this so they're attacking our fear. Comrades you must not be afraid to sacrifice for the revolution. Revolution is our savior and throughout world history it has always been revolution that freed the people. Stop the crying and complaining and do something. There's no way oppressed nations are comfortable with our oppression. We are at war at all times and here's a list of these wars:

In order to be a revolutionart we must eliminate within ourselves the disease society has infected us with. We must destr0y all forms of OPPRESSION and redefine ourselves. We destr0y Global Imperialism by "knowledge of self" and recognizing who the real enemy is. Comrades the war has been declared on all of us, if we fail to act we fail to be free.

I have the honor to Remain, Comrade
