

1 January 2019

AK DOC has and currently engages in a policy and practice that fails to notify senders of mail that has been censored (denied), which is also a procedural due process violation to publishers that are never given their Right of the chance to appeal the censorship of their publication being denied prior to disposal, as required by the laws of the United States.

There has been a couple of changes at Anchorage Correctional Complex (ACC) but these changes were not implemented until after I filed claims in Alaska Superior Court against ACC officials. Because of my claims in court, ACC officials are now increasing their retaliatory actions against me.

ACC officials are not and do not comply with United States and or the State of Alaska Laws. The officials that operate ACC are and have been in violation of Civil Law and these conditions imposed upon people being held in pretrial that are not convicted, is corruptness condoned by the Governor and Lt. Governor of Alaska, against the people of Alaska.

Alaska has the highest unemployment rate in the United States. The local media in Alaska has pushed an agenda to increase the crime rate and incarceration with fear reporting of the untruth of politicians and special interest groups, against positive crime reform. The truth is that when done right, crime reform reduces crime, but this isn't being reported about.

The currently, elected Alaska politicians are pushing to repeal Alaska Senate Bill 91 (SB91) which will remove over seven million dollars a year from programs to reduce recidivism that is allocated in SB91, from the marijuana tax that the State of Alaska collects with a designation of half of this tax going towards the reduction in recidivism and to lower the crime rate in Alaska. There is very little coverage in the news about how SB91 has and is actually working. The local media blackout is on purpose so that the turmoil in Alaska can be heightened to an overwhelming volume against SB91. The Alaska Justice Commission released a report on 1 November 2018 that shows that SB91 is indeed working and needs to be expanded on, but many politicians have NO interest in the Truth.

6 April 2019

Most all Anchorage Correctional (ACC) officials are highly incompetent. They 'lose' mail inside the facility before it gets to where its supposed to be going, both incoming and outgoing mail. They also 'lose' AK DOC forms of internal communication between the pretrial detainees and the administration. Whether this is done vindictively and maliciously, or are the people that operate Anchorage Correctional Complex really this incompetent?

I believe that its both. I have been here for almost four years and in the last year, the term 'rats abandoning a sinking ship' comes to mind. ACC has had numerous officers retire early, transfer and just up and quit. Many of them cite problems with the administration of ACC for the reason that they leave Anchorage Correctional Complex. ACC administrative officials violate the laws and ask of the Correctional Officers that operate the module (mod) housing units, to violate the laws of Alaska and the United States as well.

Anchorage Correctional Complex is a jail/pretrial facility in Anchorage, Alaska. ACC officials, mostly the Administrators, are still in violation of the law. I am being served 800-1,200 calories a day, sometimes not even 800 calories. The meal trays are unsanitary with the previous meals' food still on the meal tray and many times there are missing portions or small portions upon our meal trays. Foods high in sodium are being served and very few fresh vegetables. Our fresh vegetables are limited to a 'salad' of lettuce and or cabbage with a rare, maybe twice a month, a slice of carrot, tomato, or green bell pepper. We are not served 'salad'. The rest of the vegetables served at ACC are usually canned and almost always boiled into mush which have no food nutrient value, at least all of the sodium has been boiled out of them.

The fresh fruit of the day is always an apple. Apples are number five, on a scale of 1-10 of the most contaminated fruit for pesticides. We are occasionally served an orange or once a month a banana.

Receiving adequate, timely Clean towels, Clean clothing and Clean bedding is also still an ongoing issue here at Anchorage Correctional Complex.

The two buildings that make up ACC are and have been in a desperate need of repair for some time. After the November 2018 earthquake, the buildings should have been condemned. Support concrete walls with multiple cracks thru them, ground and upper floors that literally have dropped causing very uneven walking surfaces, cracks in the walls in the cells which bugs/mites are coming into the cells/cages that we must live in.

17 May 2019

The police state of Alaska has climbed to a very high level, I believe that Alaska government officials and politicians are trying to out do other States in the rush to complete a condition of 'Police State', furthering our nations governement to push the United States into a 'Police State Nation'.

'Big Brother' is in Your House, Your Business and Your Life.
