Hello!! \$ Warm welcomes! ☺ . ,

I want to first thank A.P.W.A. for giving me a chance to submit a true dialogue an experience of prison happenings. This is my essay:

[Feel Free to write me!] ~~~~~

My name is Marquise (Louis) Drumwright, here (in prison) they call me "CDC#AR6719 Mr. Drumwright!!" *Loud obstructive voice*, I'm a only child raised through Foster Care an group Homes; until I became older around 19-20, is when I found my birth parents. My first experience with these conflicted an confused up-bringsings in prison; was at 21 I found prison to keep favor out of the conditions, issues, \$ those residing inside the institution. From then on dealing with my own time-score of events, my time became arduous an negative. Taking relapse onto a state of uncertainty an a recalcitrant way of mind from the effect of seeing ordinary things removed from a habitual unordinary situation seeking to serve or give purpose. I'm not a particular person for campaign or second-hand too that. The merit for start, is to accept your doing time an make your conduct under a contact that you see as a recommended express "share". To rid of the debunk an wearisome nature from keeping you in a destitute awakening as before an above. My suggestion in short is establish and maintain contact of "one-on-one" or a directory that will offer a better practice for use by mail of network so as not to make you \$ your status of situation devoid from the exaggerated false claims that seek to lead an mis-guide to a answer or reply of worked up behavior for relent of change, that could be avoided; stay placid an in control for all you have to offer..
