

Catching A Predator

RD1 /

In this world there are all kinds of predators of all types (Sexual, material, informational, women, men, children, people, murderers, religious...) and they all exhibit very similar characteristics. They can't STOP is the biggest flaw they have which is what makes them a predator. Most can't help but to talk about or boast about it in some means is their 2nd big flaw. The third but far from the last is that they THINK they have POWER and are always watching for new prey without realizing that it puts off "Creepy" vibrations that most of all people are tuned to sense but have been taught to ignore... If you ever SEE a person and immediately feel DANGER, DISCOMFORT, and a need to flee, you're in the presence of a natural predator.

All predators employ the same hunting strategies and the female predators are the most dangerous because humans are programmed from birth that women are "protectors" when in truth they can be the most vicious and vile of all... Vile, you cannot have vile without EVIL... just move the "E". They always watch the people but focus in hard on their prey of choice while tracking their foe... Dopers are easy to spot for a seller who is a "USER" predator. The key is that predators always hone in on specific weaknesses that they can exploit that identifies their "PREY"... Sales Men and Women do this all the time with suckers that fall for their GAB and funny enough, in the first 30 seconds can tell if a person is vulnerable or NOT. All Predators ARE SOCIAL ENGINEERS.

Humans have no Natural Predators except other people and a famous Material Predator P.T. Barnum once said, "There is a sucker born every day and two to take him." He was a MASTER of drawing in his PREY and separating facts from their money for

himself and having them like it. His best was "This Way To The Egnis". He had a tunnel a sign that said \$1 this way to the Egnis... a clever word play as Egnis means Exit. People were paying to go out the Exit but what was amazing was that they were only mad for a few seconds or minutes as they had actually paid to see and watch the next fool come out and laugh at them for falling for the same scam. Thus now you know all SCAMS people fall for are just Social Engineering Plays of Predators to separate fools from their own money.

Not all Predators are BAD or Harmful but MANY are. Any time a person is exploiting a Mental Weakness of another it is Bad and Harmful. It doesn't matter what the circumstances and the Worst PLOY and SCAM TODAY is the fake Criminal Justice System. Good clowns and Illusionists are paid ahead of time because their PLOY is expected and is what people want to see thus they are not harmful. All Predators that perform harmful acts against others though are Dangerous (sociopaths, psychos, pedofiles, Serial Killers, Serial Rapists, Thieves, Drug Pushers, SCAM ARTISTS)...

None of the Predators realize that they constantly put that they are predators out there in their own actions and tendencies because they cannot help but focus on and hone in on their preferred prey. Yet they will always be wound up, tense and nervous while they are focused in and fantasizing about their attack as they plot the entire encounter in extreme detail in their heads. By displaying different "weaknesses" or traits that they hunt for, you can elicit their predatory response... The problem, all People have a very

Catching A Predator

RDI 1

Natural internal PREDATOR because that is Millions of years of very Natural and Normal instinct which means the right situation can trigger a Predatory response from ANYONE. The real predators are those who actively hunt and cannot STOP.

Many Predators try to put themselves in what they see as a position of power but there is no such thing in reality. Power only exists if other feel, think, and believe you have power... otherwise you just another person. These "Positions" of power is a deception to attempt to protect and preserve themselves by feebly making themselves more important than what they are. It makes others NOT believe stories and ignore what is going on. It helps their hunting grounds. Most fear challenging an ALPHA but again, that's a deception. Power or Control over others is NOT the Predators goal. No... It's the thrill of the hunt and the rush of a successful hunt. It's a powerful rush that can last for days, even weeks or months... sometimes years. All Deer hunters know this rush just as the agonizing disappointment of failure. The educated idiots called psychiatrists and psychologists all say it is about control but it was NEVER that... it's a deeper more primal need or animal need of the sub conscious for that hunt and success of it. The high is stronger by more than 1000X any known substance today.

All Predators except one effect such a small area or group of people that with the exception of Elizabeth Bathory with a body count of over 600 and another serial killer with a body count of over 300, is GOVERNMENT. Germany in the 1940's is responsible for the deaths of 13 Million, Pol Pot had Millions, Serbs, Kroats, the Middle

East, the United States has a Genocide of hundreds of Millions... Government is the worst Predator. It starts out to ensure Peace and Liberty, becomes corrupt by People of Power and begins to exploit its People for more power, more money than starts to kill the people it sees as Undesirables. Every time they establish the Death Camps or Concentration SLAVE (WORK) Camps / institutions with fences and everything to keep the SLAVES or undesirable in. In the United States People ~~freak~~ freak out about the FEMA Death camps and ignore the U.S. Prisons that ARE Concentration SLAVE and Death Camps.

There are many methods in catching Predators as there will always be a trophy of some kind, documentation, or word of mouth because the Predator wants a memorabilia of the successful hunt and to brag about it. Deer hunters collect horns and tell stories, Hackers brag on Dark Web Forums and hold data, Serial killers and/or Serial Rapists will keep a personal item of their victims... There is always something and the Government is NO Exception. With the Government there is always talks and what-if conversations that always lead up to the actual event and the most interesting is that all predators do a smaller or mock hunt to test what they are going to do to test themselves and their strategy and their strategy will always change at first kill they settle in to the preferred attack method or style and preferred victims... This becomes their signature... and it with boasting and bragging leads to catching them.

In the State of Arkansas, the worst Predator is the Government System that hunts using its "Criminal Justice" system.

Catching A Predator

RDI

The Corrupt "Criminal Justice" System composed of the Police, Prosecuting Attorneys, Defense Attorneys, Judges, Legislature (Senators and Representatives), Governors, Courts, and the real predator that uses all the others to hunt, the Arkansas Department of Correction (ADC) run by the Arkansas Board of Correction (ABC) that also controls the Parole Board and Parole Officers all designed to put Women, Men, and both Female and Male Children from ages 6 to 17 in the Court System and Prison which all makes money for the State. In these "Correction Centers" that are actually Concentration SLAVE Camps all people are forced into SLAVERY and some into SEX Trafficking. Drugs are pushed to the addicts and willing plants (Inmate Enforcers) force others to be compliant or else. Many are killed but all are forced into SLAVERY, TYRANNY, ABUSES, TORTURE and you cannot do anything to defend yourself because all the State Systems get MONEY from ADC. BUT WAIT, They can be Caught!

ADC's achilles heel is Staffing, Correctional Officers... So many Gang Members and Honest People get hired on. The crooked get caught trafficking drugs and contraband or selling Sex to or buying it from inmates or using drugs, delivering, and they get caught. The honest people see what is going on, the work and living conditions, corruption and treatment and thus QUIT. News Articles, ADC Internal Documentation even altered documents all exist. People, employees TALK... Running a couple of People through the Jails, Court process to see how the Prosecution, Defense, and Judge all have the same employer and work together then get on the inside with "Medical" issues and everything to see how

They are treated. Put undercover agents in as Officers and a
 Inmates to get a complete picture of BOTH sides. The Inmate
 will get first hand of all the illegal and unconstitutional
 things that go on from jail, court, to prison and the
 officers get to record staff buster and steal documents and
 digital records. It's all right there and they need to try to
 Appeal, wait and try, go through medical, file grievances, all
 things an Officer and Inmate may need to do or experience
 and report it all, every step of the way. Trying to get
 legal help, file a case, protect themselves... everything.
 It's all there to catch them.

I will do it. I will fund a project to pay these
 people, Men, Women, and children to go through this system
 and report on everything from start to finish... Inmates and
 Employees. Gather the documentation on all the activity and the
 conditions and the treatment, Abuse, Medical Malpractice. The
 whole thing. I'm willing to do this in all states because I
 want to protect the People and save them from our very
 Predatory Government. I will go through the full Processes of
 "Catching A Predator" and one of the WORST of ALL!!! Join
 me in #ALLOFUS...
