

The Mean Girls...

By: Erin Kuhn - Brown #7203

18.3.2019

Hearing the title to my essay you would probably think of the popular movie that Lindsey Lohan was in... well, that title does not reference that movie, rather, some of the female NDOC officers. I was already aware of huge issues within this place, and going to eat breakfast this morning was the absolute topen to this topic. As I entered Culinairy I see 3 female officers leaned up against the wall laughing. Talking next to where we pick up our food. I walked away to sit down, and sat at the table. And when my roommate sat down, we witnessed one of the ladies from our pod who is very sick and walks with a walker, attempt to have another inmate carry her tray from the food.

- one -

Window. As Cto Williams speaks up
loudly, and says "oh so, the car, carry
her then Gray." As the inmate with the
walker walks away, Cto Logan makes
the comment "oh look, this one is really
high, the car barely walk", and at that
point Cto Burkett, Cto Williams, & Cto Logan
start laughing like a bunch of mean
6th graders. As we continue to watch,
Cto Baugrass walks up to the group
that's laughing and ends up looking at what
they are talking about, smiles & shakes
his head & walks away. The sad
truth to all of this, is that a Senior
Officer witnessed inappropriate behavior
which actually was discrimination against
someone who is actually disabled,
because her spouse ran over her
in his car, and broke her back,
leg, etc... Within this facility the
sad realization is that there is no
one to take concerns such as this
that are so wrong, because staff
regardless of rank join in with each
other, and when that happens I
have zero respect for any of them.
It also seems that some of the
staff act & respond (at times) in ways

that are more befitting of a State
employee, dependent on which other
Staff members they are assigned.
It brings a popular song from
my past to mind, with a few words
changed.

All the way from Gore Hall,
To the Neck of my woods,
please tell me, How Discriminatory
you can get?
