MCP

Society, much like the universe is constituted by the past ages. The difference between them is that one is human and under the plan of the other. What I'm saying is that the order of the universe controls society and its inhabitants.

Why are intellectuals more at risk of becoming a cynic than an ignorant man who does not follow Academia? The answer is simple the Academic is a fool who believes in a structure that was created to doom people's lives. Further I concluded there is a psychic nature that academia only warps in people's eyes.

Omniscient is a goal for beings for many reasons but in order to come out on top beings sometimes need to topple over each other and one up their way toward ultimate

Enlightenment.

Aliens Created our non-religious lifestyles in order to conquer and destroy us and our planet. Life does not go along peacefully with academics it creates conspiracies, paranoia, and mind control that turns us against our peace with God and His people.

For example, I believe the old belief that we only use a fraction of our brains potential. Therefore I can open an entire reality only certain few will ever experience. The psychic part of our selves the abilities of our mind that link us to God and His life. This world has only become more of a battle field between Evil vs Good. Mentally people are put away rather than properly assessed suicides, mass shootings, fire, media, politics, wars, hunger, hate; Believe in God
