

## Just fill out a Reversal...

By: Erin Kuhn - Brown 72103

The NDOC at Finlugg in Las Vegas, NV. Provides Health Care for inmates in their care with a Co-Pay of \$8 for each visit. It has become a standard occurrence at this facility to be charged for visits that never happened, or the doctor cancelled and the inmates are charged for the visit anyway. It's become a necessity, unfortunately, to keep a log book for any movement or time... anything done with medical. A couple weeks ago, as I was checking my monthly statement on the book, I discovered that I was charged \$25.00 for a "Man-Down"... which technically means that medical personnel brought you on a journey to medical... it never happened. The comment that proceeds after that by NDOC staff, is just fill out a medical reversal and you will get your money back.

- ore -

That is Not True. Let me say to Brian...  
It is Not True! I have filled out many  
reversal forms, sent it to Medical, and  
the Director of Nursing Signs off on  
it, and then sends it to some place  
to have the money put on your account.  
I believe the place is called Inmate Banking  
... I rather would like to believe that  
it is called NDOC Employee Credit Union. At this  
point I have yet to speak with another  
inmate Bill incarcerated that has ever  
received any money back. It is one thing  
to receive treatment & be charged for services  
and completely another to have charges  
they deducted from your account, which  
you had not planned on because no services  
were rendered. Now the brass tacks, which are  
like checks begin to bounce, and it  
would appear that you are not a wise  
money manager either. That is Not True.  
After much digging, no one will identify  
who is responsible for making deductions  
to the account. The Medical dept are  
quick to defend themselves, and state  
that the charges are made off the  
At this point, I am not sure if I am  
apart of a gofund me account for NDOC  
or not. I guess I'll never know.
