The American Prison Writing Archive (APWA)

Within the battle of women rights and being in so many fights because in a fight the power kinda guy I've noticed that women have a couple more structuring to themselves like they don't have a sea of boys around them on the yard like the unnoticed brushing and searches; like objection no to can I sit next to you Mrs. like incidents of Mrs. officer and the Sgt officer pushing up on her and she is negative there are so many miles for them to go through to them acknowledge me daily and for ~~earnings~~ ^{incentives} of them dealing with me as a senior inmate. Whereas every inmate is dealt with to atleast a normal standard except me like for instance the wolf inmate that keeps the sheep inmates has a talk with the shepherd girls ~~officer~~ counselor that I need to be moved or they move themselves those damn boys seem to always have incidents which I relate to from can't adjust with the future I see for women you know how there's always a sex trafficking on the news well all of this isn't handled right enough and it makes me want to give up on them I don't know how not to.

ps. for instance why do they have a reflex to knock on the window when there food arrives but I don't have that reflex
