# The Biggest Rescue Mission in <sup>existence</sup>

I came across the psychic order of life through my section of home negotiators who had no address and had incest and racism in their families. I planned to expose them to their illegal counterpart home which they spy on with respect to drugs and human trafficking that lead me on to believe they were Law Enforcement. I sometimes still think they are law enforcement due to their very organized psychic order but I see all of them are under cover and get their hands dirty.

Murder, drugs, and prostitution and smuggling are the main things they do, but possession, haunting, and illness employment are also their work.

I'm trying to expose the devil and the war on good and evil not by taking aside but by bringing everybody to it. I believe the people should know that Mental and physical illness has its roots in spiritual warfare just like Jesus Christ said after all. I believe I can resurge a revival in the good faith by weeding out its hindrances and revitalizing it in doing so. The devil gains ground by manipulating innocence by the very act of trouble and problematic defilement.

People wake up one morning  
and live out a day that changes  
their good faith in the creation of  
life. It's getting worse. Idolment  
is at a all time high and the  
idol community is becoming devil worship  
ers.

To all  
community

We need to talk about it  
and notice theres a psych out  
there that hate on people because  
of petty excuses, such as race,  
wealthy and hygiene. The devil  
has evolved to be very acceptable  
seemingly good people. Something  
about them will always look off.  
They recruit people for immoral  
or antireligious acts. Be strong  
people.
