

In the life we all make bad choices because
 some times its a real bad choice standing next
 to a really bad choice. Scientist want to say
 that we have another choice that wont gonna
 kill us or end us up dead or in Jail but the
 reality is we all have made dumb mistakes
 while making choices. This is the story of
 my life hard cuff bad luck or no luck at
 all, and in the end who is there to help
 us if you ask me nobody I mean I never
 got any.
