

## " Modern Slavery "

By Alan Sorensen

Political parties are now paying attention, and it shows in our homes and in the streets, the all too strange 2020 politics is the time for change, and people are really justifiably anxious for many good reasons, jobs and money or the absence of such makes it clear that the old days of using tax payer hard earned resources on every little nonsense is coming to an end.

Perhaps you have heard it all before, all the tired media spin of old ideas, but have you thought about the deeper meaning that effects every Colorado resident, all the clich'es and prosaic ideas as the good boy's walk the halls of justice preying on peoples fears.

Here it is in a nut shell, or more to the point, about your dollars and cents, because in the end that's what it's about, what all the Trumps of the world will never tell you and why more than ever you need to vote now!

How is it that the state uses the 'census' of thousands in prison for the purpose of taxation, yes this is your money from all your hard work and sacrifice, but at the same time denies such people even the right to vote, and pays them next to nothing in what is truly a form of slavery of those least protected, all in your name.

Yes, you have been told most have broken the law, are you even sure this is true in the age of political correctness, even so, to quote the governor, such peoples punishment was removal from society, not to serve some new age slave master.

History tells us the only way to oppose such abuses, not unlike those who fought for the right to vote, is to abolish such immoral practices and discrimination is through checks and balances, Civil rights must be for all, justice must be for all or there is no rights or justice for any.

Just a Thought!
