

1 The law itself could be the worst crime of all!!

4-6-21

First I want to thank you for your time and for what you are doing! I am 37 years old and have 2 kids that I love and miss everyday! I just got to death row and wow! I found out real fast that most the people on death row in California are from Riverside and Los Angeles. I cant speak about LA But Riverside I can the District Attorneys in riverside (that's where this all starts) are heart less! They try and get away with sentencing as many people to the Max as they can it almost seems like they get Kick backs from the state. The District Attorneys have so much more money to work with than the Public Defenders do this is not right and people need to know what is going on! The Justice system starts at a local level and we all live in that local level if you think about it so that is where we need to start pushing back! The District Attorneys take the Cop's side (that also have so much money to work with) and push to lock us away from are familys and friends! We are not all monsters! We are fathers, sons, brothers we are people that made a mastake but because it was in Riverside it is a death sentence! Death as a punishment for crime is nothing more then calculated, premeditated, administrative MURDER!!! It is not a crime for the

2

State or county to Kill you but it is a crime for you this is not right! Killing should be a crime more so for the state and county then for you it is do as I say and not as I do. Another problem is the medical examiners are run by the Sheriffs they do the autopsys and tell the sheriffs and districts attorneys how things happend that is a conflict of interest. The California Department of Corrections and Rehabilitation Where is the rehabilitation if you are sentenced to death or life without the possibility of parole? Last thing is restitution fines for us on death row they will not let us work or have jobs so we cant pay our restitution off like everyone in prison so what is happening is when are family and friends put money on arc books they are taking 70% of it so are family and friends are paying are restitution why are they taking money from someone that did nothing wrong? Thank you for reading this please help! If you have any Questions feel free to write me and ask stay safe and could free!!
