

When I returned to prison to convalesce, my prison doctor told me that I was expected to die within 6 months, He recommended compassionate release.

I have recovered from the effects of the surgery. But there is ~~a~~ time bomb in my body that will take my life sooner rather than later. If cancer had looked for my cancer in a timely manner, I could be in a far better situation with long life expectancy.

As far as I am concerned, God can damn them to ~~the~~ hell.

Goodbye.
