

This story is about a 10 year old and under is been forced to register as sex offender. So the name of this story is a 10 year old and under are 2 go register. What is wrong with America that would let this happen to young children this law is for adults not children. This should not be happening in America, so if a little kid kiss another kid in grade school they consider this a sex crime. It's is unbelievable that schools would consider this a sex crime so we say it's okay in some countries that a 12 year old and a 13 year old can get married but when it comes to consider a kid as a sex offender something is wrong with this picture. This law that they brought out in 1994 should be on sexual preator's and be restricted for sexual preator's only not young kids that are 14 and under. It should not be require to register for kids 14 and under as sex offender's in America. We are suppose to be the greatest country are we?
