Title: Colorism!

Colorism is the practice of favoring those of lighter complexions over those with darker complexions,

And even parents have adopted these slavery methodologies by favoring the lighter child and showing the darker ones less affection.

Hollywood and supervisors of corporations are excluding those with darker hues of skin from opportunities in favor of those of a fairer shade,

Colorism is another toxic residue of slavery that can be traced back to the plantations and in the 21st century it now has become a plague.

It's rare to see an individual with a darker skin tone in a position of high authority,

What ever happened to the equal protection clause because this is done regardless of education, skill, talent, or a person's overall ability.

The caucasian man uses savvy language as he discuss his preference to only date lighter melanin woman,

And the darker African American male make statements such as he only dates red bones and his subconscious boldly tells him that he is winning.

This is another form of bigotry, disenfranchisement, and systems of institutional racism,

Colorism causes internal strife and deep divisions within the African American community so as one united we must abolish this act of colorism.
