

Title: Our Death Penalty!

The Corona virus is running throughout the prisons at a very high symphony of speed while attacking inmates very sporadic and vigorously,

And you could be doing 1, 5, 10 years OR life, it doesn't even matter any more because Covid is our new judge that's now giving us the death penalty.

I asked a guard about the reprieve system and my expectation of going home one day soon,

And his insertive dialogue expressed that there's no need for a reprieve incentive because the more inmates that die will continue to create more room.

There's no sympathy for the inmates that has passed away and the people of high positions are not trying to open these gates,

I wonder why the guards are the breeders and traders that brings it into the facilities but yet only 3 guards has passed away compared to killing over 75 inmates,

This deadly virus is coming in through kitchen staff workers, mail, and guards doing cell searches and we are fighting this virus with total resistance,

The Government and commutation officials aren't giving us any assistance.

If you read the statistics of this death sentence that's killing inmates you will find that mostly Spanish and blacks are the majority of the casualties,

You can now be a parole violator with a DUI or have a minute drug case but yet still receive the death penalty!
