

I was reading the latest P.L.N issue which I got from a friend. And it occurred to me that there is a huge audience out there that has been blinded by these labels that have been falsely associated with reality. I think there is a higher demand for comfort. People are not aware that we have incorporated our prison ^{system} ~~schemes~~ from ^{world} war II, and has not been conscious of these adopted war strategies. Germany would build ^{their} war machines in buildings and ^{put} associated a false label on ~~the~~ buildings to hide ^{their} true agenda. I had to ask myself if this what happened in 1992 when Gov. Ann Richards built several programs all across Texas. We spent millions on rehabilitation centers only to convert them into ~~incarceration~~ incarceration centers after a few years. Makes you ask yourself if there was ever an intent for rehabilitation or was it ^{just} a mask to build prisons. Then I had to ask myself about the transition that had to take place to convert these programs into prisons. You would think it would take years to reconstruct this conversion, ^{but} it was done in seconds. All they did was close the door to a class room that was no bigger than 12x30 which is now a small storage space. which arises another question, how were they suppose to effectively program all these individuals in such a small area? Better question is how can you build prisons without causing panic from it's citizens? Easy, you build the prisons structure as a program, then you drop the program and keep the remains. This is exactly what happened thirty years ago. It's mind blowing we built ^{with} ~~behind~~ a purpose and then leave that purpose to rot in corruption. This whole prison experience has been like a Nazi nightmare. I can remember being chained to another poor soul headed to my unknown destination. Texas policies will not ~~tell~~ ^{know} you where you're going when ~~you're~~ being transferred to your new work assignment. I can remember thinking to myself this is exactly the same strategies the nazi used on the jews when they were transported on the trains to ~~the~~ ^{their} camps. death camps. Here in Texas we still have death camps but renamed them to Death row. They changed ^{the} name to change the perception but keep the ~~same~~ ^{end} results. Trying to coat the reality of the Killing

process that goes on. There's even a desensitizing state strategy that keeps the slave numb to the reality. ^{They're kept} ~~There~~ kept at another camp until death time which they will ^{then} be delivered over to the state killers, which we call them officers. But judging by ^{their} ~~there~~ actions they look like S.S. dressed in T.O.C clothes. The killing grounds feeds its population ~~chicken~~ on killing day. Everyone in camp is excited about execution day to them it's chicken day. Prisoner's minds are ruled by ^{over} ~~there~~ ^{their} appetite and loses sight of ^{the} process of death. This feast has created a happy environment in the camp itself. Everyone has subconsciously blocked out the current event that's taking place. After execution is declared the witnesses & state killers ~~are~~ celebrate ^{their} ~~there~~ victory and sweep death under the rug of "I'm just doing my job". The only ones who are held accountable for ^{their} ~~there~~ actions are the slaves. People say, but y'all aint slaves, well let's analyze what it means to be a slave. The web dictionary explained it as a person held as property. News flash, Texas has claimed ^{their} ~~there~~ slaves by issuing a number by ^{their} ~~there~~ name. ~~These~~ Texas slaves must work without wages, the only payments are bad food & hopes. These are modern day slave plantations designed to destroy the human spirit. Recently several prisons in South Texas were emptied out to house immigrants at the borders. As Texas inmates were rushed out into the new extreme neat environment. A/C units were being installed for these immigrants cause it was declared that the preexisting living condition were in humane for the immigrants but okay for U.S. citizens. I thought we became politically aware of these inhumane environments, ~~for not a select few or only immigrants but as a whole.~~ ^{that we were} and ~~was~~ moving towards a higher degree of existence as a country. But we are drowning in stagnate waters and blinded by the reflection of the past. ~~We~~ are American prisons are not evolving, but ^{becoming} saturated in old war ~~politics~~ ~~stat~~ strategies for purging purposes only. Washing ^{their} ~~there~~ hands in the innocent bloodshed system they designed.
