

A gallon of water

Could a gallon of water  
be a sign of caring?  
It was to others and I.  
It was a sign of hope,  
coming from some one who cares.  
Her action told me that  
among the prison guards, are some  
who forget to be guards  
in times of need, and become humane,  
Able to see that we are humans too.  
The action of that officer,  
who gave us a gallon of water,  
had more meaning to us than  
the water itself.  
It was lovely to know,  
that some-one really cares,  
She was a blessing from the sky.  
I thank God for the existence  
of humane officer in any prison.  
And special thanks to the officer  
who saw no difference  
when we were in need.  
Your action was and will always be  
appreciated for that and more,  
I thank you with all my heart.

The thanks is from C.I.M., [redacted] yard to the officer in the quarantined  
quarantine building during the covid-19 pandemic on [redacted] yard.
