

## Prejudice Box

Eliminating prejudice from criminal courts would be ideal for the justice system. This is the reason we need to build a ~~pre~~ prejudice box. This box would be inserted in every court system. It will keep jurors from seeing the color of skin, tattoos, or any other prejudice elements. A box big enough for the client & his attorney. This box will keep jurors from connecting any unwanted, or irrelevant to the case. Only hearing the case that is presented with a name or assigned number. The court must limit the jurors mind from contamination from human prejudice. Never seeing the defendants will eliminate all unnecessary influences. Justice is supposed to be blind. This concept has been established with lady liberty. We also could use those same principles inside these court rooms by blinding our jurors eyes, only allowing a sound mind to judge the case as it is presented. This will also prevent future mistrials due to it eliminates the handcuff procedure being witnessed by the jurors. A guard can detain & secure the person in the box or contain the whole box as needed. It also eliminates any possibility of any violent acts coming from the defendant. This box will have an intercom so the judge and defendant will have the ability for correspondence. The defendant will only have a voice coming from the box. This box will give the jurors a better navigation for their decision. This also eliminates mistrials on selecting jurors based off race. The box eliminates the need of a certain race in the stand. The box will eliminate favoritism & racism.
