

Since the overthrowing of America from The British, We've allowed a Free view point, protected by our U.S. Constitutional 1st Amendment. The view point I'm speaking on here is a Racist view point of The African American/former Slave of America. Every negative connotation I can think of has been attributed to The African American, starting with the N-word-meaning A Black Person. This was and still is a Racist view point that's allowed to prevail, even being it's one of the most offensive words in History. This word has been instilled in almost all of America's DNA, and lawfully considered Freedom of Speech. America under our U.S. Constitution is 245 years old, but the negative and racist view point from our Caucasian counterparts are well over 500 years old.

We know now how negative views and openly racist opinions are harmful. Rather it's said to a Child or Adult, it's very harmful to hear you're stupid, ugly, fat, pitiful, nasty, dumb and/or The N-word constantly in life. Well that's what 's been happening in America for 500 years as Free Speech! It's truly a Racist view point and must be stopped immediately. Generation after Generation the Hatred has grown for one another. Besides this daily action of our Citizenry, check our Newspapers and Magazines in print, and see their Racist and Negative view points of African Americans, and how they've shaped and formed American Lives under Freedom of the Press, which is also protected by the 1st Amendment. Start with the 1900's onward, and I assure you all too will be shocked. The view point of Black and White fully integrating has never been accepted. Those Racists in Power, rather Wealthy or Governmental, have caused US irreparable harm, based on Their view point of COLOR and nothing else.

When or If anyone ask Seri or Alexis "What have African Americans contributed to America's existence?" -- it too will blow your mind. For they don't teach this in our Schools, Colleges and Universities but, it's widely known. Without African Americans, America wouldn't be America as we know Her. Today, Racism is still the leading cause of America's biggest problems, as it was these past 500 years. The only ones in disagreement are The Racists! We all have view points, but we're not all heard or recognized. It's time "WE THE PEOPLE" stand up to these Racist negative views, because there's no Constitutional Right to Harm Me or Others because you're a Racist. It's time to fix America of Her internal issues, like Race, Poverty and Equality. We see the negative view points are working all over the Poorest areas of America. This is where the most violence and drug use occurs, and where Jail and Prison populations are from. What a negative and racist view point from our own. Judge not, ye won't be judged: Matthew 7-1.
