

The Life of the

HARD-TIME

at the Fairfax ADC

Topic sentence • The definition of doing time in a place where it's wild and crazy.

Thesis Statement • This is hard time at it's finest.

paragraph 1 (Commissary) I be feeling incriminated everytime they do what they're not supposed to do. ~~They~~ They always have something missing out of every commissary gift bag or bag. They treat their customers poorly. I feel like I want to just save money in an account, buy books, or get magazine subscriptions, then buy commissary here. I say the fuck with that! Forget Aramark all the way.

paragraph 2 (~~the~~ Treatment) This jail treats inmates like me, like mental health patients. They try to do fear tactics and unwanted touching. ~~We~~ We only get two trays a day and should get three. We have to have no money on our accounts because they take ~~\$~~ two dollars a day and we have negative accounts, we have to do morning walkthroughs that are so pointless. It's just bad from all sides inmates, ~~and~~ ^{and} the line. This place never gets cleaned and when it does it's only one a day (bad for our time).

paragraph 3 (Classification ~~Programs~~) They're racist when it comes to classification. They put blacks mostly on the fourth floor, in the northside part of the building. They mix us up with stranger dangers, wild and crazy, mental health people whom supposed to be placed at one see lock. Everybody else gets placed as trusted and STAR Program but will have the same grade charged as I, oo. How does that not sound racist. Northside building looks never like the inner city and other side is like the suburbs, LOL

Paragraph 4 (Programs): They choose whom they want in their programs. Some programs I've taken haven't been bad. They are useful at times. They should take a lot of their programs and replace them with new ones. Their book carts always have the same books every time you get to the book cart. They have thousands of books but hold them back from us. Some classes would cancel and you wouldn't know it and they wouldn't let you graduate certain classes. At least I have ten certificates anyway, so haha! you have to stay on them so you can do what's needed.

paragraph 5 (system): If you're not careful, it can break you more than make you. Just take your mind and soul out of this place, make a ten point end game plan that is realistic and designed for you to help you make it. Get good help like a small support circle. Keep distance from all negative auras. Move here like you're at the public restroom. Flush the toilet while you're passing, like at the public restroom. You need to have respect and manners. Conduct yourself like your age and not of your shoe size.

Thesis Statement - Things ~~are~~ get hard but you have to have perseverance to win or you'll lose.

Conclusion: You can only make it here with a mind, body, and soul that is ready for ~~the~~ transition and growth.
