

March 11, 2021

I have been trying to manage all of these things that have become true in my life during this incarceration it is getting to be more than anyone could ever expect to handle and apparently if I get on the phone and tell anyone that I have actually seen the through the worst The next thing I know here comes more apparently now we are expected to cell up with COVID survivors. I myself have only recently shaken off Tuberculosis (TB) illness and I have been deemed vulnerable to COVID19 I self Quarantine I wear my mask I do not smoke anything! Continually I have been asked and told to do what I would not ask anyone to do Everyone is just waiting for a chance to spit on anyone for any reason but if you defend yourself = more time locked up less freedom inside!

your truly State Sids OG
