

How Many Errors??

For your personal,
feel free to share -

The enclosed is an actual memo, posted by USP Tucson's Education Department. I realize this could be seen as simply too absurd to be true, but I promise you, it is quite true.

Read the memo on "Employment Resource Center (E.R.C.)" and see how many basic errors you find. There are at least a DOZEN that are included, leaving anyone to wonder, "Why would a federal facility allow such apparently underqualified people to work here?"

To note, the name at the bottom proves that the document was printed off the computer, using TRU-Links (like credits), and thus, was paid for. One could argue that maybe this isn't authentic; that maybe an inmate typed it for malicious means.

To do that, however, the inmate would have had access to a computer to allow him to make such a memo, then post it for the entire compound to see. These venues are security-related, so if this was such a joke to a particular inmate, it shows the Education Department is incompetent with their own resources. And a simple review of cameras would have found the inmate culprit...

But it wasn't an inmate, so we fall back to Education staff. Who, in Education, could have possibly typed and sent out a memo with so many errors, they themselves should be in the GED class they force inmates to attend.

Take a look at the enclosed, and see what inmates at USP Tucson have to deal with —

EMPLOYMENT RESCOURSE CENTER (E.R.C)

The E.R.C is now making a host of information available to the inmate population if you are interested in any of the folling please visit the E.R.C located in the Education department. We offer help with
