

* Please Excuse Any Misspelling

①

Greetings from the depths of concret, electricfied fences, live ammunition & none lethals. Hello! America & the human race.

My name is [REDACTED] I am U.S. born & currently incarcerated. My path to prison started young. Since the age of 16; In juvenal hall educators informed us that statistically a good number of us will end up in prison. I am born in the great state of California the gang capital of the world is Los Angeles & a state population of 39 million now. We have 33 state prisons in my state not including Federal. My state recenently banned private prisons which is good. For a U.S. Citizen should be in the care of his or her state of were the crime/crimes were committed NOT Some private prison / company for profit. Explotation of any human being is & should be treason especially in our country. I am a Southern California beach boy who grew up in a broken home meaning one parent raised my brothers & I. I come from a big family. I have family who have served in law enforcement & family

2

Who have been to prison. I was raised always doing the right thing. Although life is not perfect. The small city I grew up in was really just a small beach town on dirt with a pier some hotles, fast food joints & our military bases. Now it has flourished. There has always been a gang influence there. And because of our Southern border there has always been a mass amount of illicit narcotics. Unconsciously chasing girls, smoking weed & rolling around the local crew led to prison.

Although it is deeper then that. Raised by a single mother has had a big impact; for the fundamental unit of society, any society is the family; Before any institution church/religion, school ect... Also addiction to either illicit or pharmaceuticals drugs has had an extreme impact. The United States of America is the number one #1 consumer of illicit & pharmaceuticals Drugs in the world. We have a Drug problem! Addiction is a biological/medical problem. Substance use disorder affects biological processes. Addiction is a

3

primary disorder that must be treated. People who have mental health & substance use disorders who get in trouble with our criminal justice system should first be given the option to get help. We should invest in our citizens which are human beings and get them back to work & living healthy lives. Nothing is of more value than the human being. Life! The wheels of justice move slow, is the saying. I believe California is on the right path. Prisons are cities within cities that's how big prisons are. I know a pilot & one day he said that he believes at a low altitude he can fly from the west coast to the east coast navigating with just the prison lights! Prisons are ran by the prisoners; meaning, cleaning, food, laundry, LABOR. The second part of the 13th amendment needs to be abolished. Prisoners should be paid minimum wage for there labor & the correct just wage for a higher skill period! Sweat shops still exist

(4)

in the land of the free you know where? behind prison walls! Everything in our country the United States of America is political & Economical. Everything we the people have was fought & taken. It has long been proven that tough on crime policies & this cultural of "we back the badge" has no effect on violent crime or crime at all & causes Unhealthy Division. We can & need to start doing better for our country. How is it that the United States of America is the Land of the free & leader of the free world yet we lock up more people than these tyrannical & Terroristic governments? This "lock em up" agenda is unhealthy & abusive especially for drug related non-striking non-violent crime. Young students of my country the U.S.A. & abroad we need to stick to the facts & truth & here in the U.S. we need to always stick to the U.S. Constitution which includes the Bill of Rights which is

5

human rights & the Supreme Law of the land. We should never be manipulated to philosophies & ideologies that are for & condone unhealthy, unconstitutional, exploitative agendas that ultimately harm the human I humbly believe that the weaponization of our penal system here in the U.S. began after the Civil War with the Southern States & their black codes. The criminal justice system has done me more damage than good. Because of my strong faith in God, Love & the human spirit is how I cope, survive & deal with time inside & out. Education! Education! is the way to go & a sincerer honest way to redeem oneself, a true second chance to clean up one's records. There are certain things that are just about impossible to do by force, so Education is the only true way. Like with this fentanyl crisis. Fentanyl's main chemicals are produced in China then shipped to Mexico our Sister Republic, then ultimately

6

brought here to the U.S. People in every community are dropping like flies. To me it's just the same as dropping mini bombs in a chemical warfare sense. That's an act of war!

Covid-19, Fentanyl has killed more Americans than last I checked. Same thing with Covid, we get it back to how it was & should be with TRADE with China then all of a sudden Covid! I am also in favor of a state & Federal registry for law enforcement who are fired for any abuse. A registry would prevent these types of people to ever get hired at another police department or policing jobs period! Another thing as well state's need to legislate that if it is clear that law enforcement have violated a U.S. citizen's Constitutional rights or any human beings, then the victims may civilly sue & this qualified immunity is void for them.

We human beings were not created to be caged like animals & that alone creates stress, unhealthy constant stress.

7

I pray that my experiance & live testimony has helped & educated in anyway to grasp what were dealing with, especially here in The United State of America.

America's Crimminal justic System is weponized. If an American does not have \$ Money or powerful infivence For Example "Patrichia Hearst" To properly invoke his or her God given Rights, then Buckle up. Here in America we have a "Punishment Economy" Legal Slavery. We have a long way to go lady's & Gentelmen. Please Excuse Any Misspelling. In GOD WE TRUST!
