The GTL Network scam, selling used tablets to inmates

GTL now sells only refurbished (used) tablets, for \$80⁰⁰ plus tax. When its broken, and it will break, because it is someone else's broken tablet, they fixed and resold, to someone else, that you will never get back.

In order for you to get a working used tablet, they fixed and resold (which could have been yours), you must turn yours in. They do not repair tablets anymore, because that is the right thing to do.

Here's the deal, The PA-DOC makes a deal with GTL Network. There is no warranty on hardware, only software issues on the malfunctioned tablets. Your only option is to buy a used one someone else beat up for \$80⁰⁰ plus tax, and turn yours in for a "one for one" transaction, or within 60 days your tablet will stop working, and lock up, forcing you to buy a used tablet. The PA-DOC has lined up, as well as their pockets.

The PA-DOC ~~puts~~ ^{sets} a cut out of all the "used" tablets being sold, and resold, to unsuspecting inmates, be prepared to exchange your charger in too, for another one.

So, if you want to listen to your music, you paid for, or play the games you paid for, on the tablet, you paid for. Then you will play the game of buying used tablets, to play your purchases on, until the next tablet breaks down. Enjoy. Because you will be interesting in another tablet, and the scam continues.

I asked to send my tablet, (purchased new, or was #3)

home to get fixed, (since GTL does not fix tablets unless its to benefit the scam), that answer is NO, I cannot send it home to get fixed.

There is only one reason they dont want the tablet to go outside GTL Service Station or PA/DAC. The scam of stealing money from unsuspecting inmates will end.

Buyer Beware!
